

New promotion!

NovaSeq Sequencing as low as

\$5599/lane

for ≥ 8 lanes
per batch

For researchers preparing libraries themselves, Novogene ensures the highest quality data with competitive prices and industry-leading turnaround times to meet your budget and deadline.

Novogene Advantages:

- Competitive prices
- 8-working-day-turnaround time after library QC confirmation
- Complementary data QC with data quality exceeding illumina benchmarks
- Extensive expertise in Next-Generation Sequencing (NGS) services and solutions

Service Highlights:

- Pre-made library samples only
- Platform: NovaSeq 6000-S4
- Sequencing strategy: PE150
- Data output: approximate 750Gb (2500M reads) per lane
- Data delivered in FASTQ files
- Order by lane
- Applications range from Whole Genome Sequencing (WGS) to epigenetic sequencing

Notes:

- Data output may vary depending on the the quality of the library
- Promotion valid for samples and POs arriving before March 31st, 2020
- Data analysis is available at an additional cost

* Only for research use in North and South America.
