

Novogene Cambridge Sequencing Centre

Novogene Cambridge Sequencing Centre relocated to Cambridge Science Park in August, 2019. Currently, we have more than 30 employees working in the lab. The center is equipped with NovaSeq 6000 sequencers and associated supporting facilities, providing a solid guarantee for future business development of Novogene Europe.

High Data Quality and Unsurpassed Turn Around Time

Novogene delivers the high possible data quality for customers. Strict quality control criteria and bioinformatics expertise enable us to offer an industry leading Q30 guarantee, which exceeds Illumina's guarantee. Additionally, we always provide an unsurpassed Turn Around Time, especially after we moved to the new lab in Cambridge Science Park. Our service quality and efficiency are both beyond other service providers in the world.

About Novogene

Novogene provides genomic services and solutions with cutting edge sequencing platforms and bioinformatics expertise. Now our company is carrying more advanced sequencing throughput in the world. Novogene is well known for its scientific research team, unsurpassed data quality and friendly customer service, supporting clients to achieve their research goals in the omics era. With over 2,600 employees, multiple branches all around the world, 27 NGS related patents, and >460 publications in top tier journals in just 8 years, Novogene rapidly grew into a world-leader in the sequencing market.

Service in UK

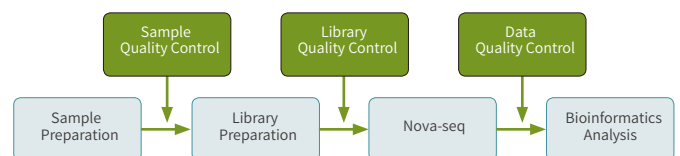

Technology

Novogene Cambridge Sequencing Centre is equipped with a full automation system, the latest Illumina NovaSeq and supercomputing platforms. All facilities enable Novogene to provide cutting-edge sequencing & bioinformatics services and solutions to researchers and scientists in European universities, research institutes, pharmaceutical companies, and biotechnology companies.
